IACET
CEU CREDITS
CAN BE EARNED

**ASME/OSHA
BASIC RIGGING REQUIREMENTS
2008**

**Two Day Rigging Trainer Development Program
No cost to Crosby Product users.**

This SEMINAR and support materials were developed for the Crosby product line. The materials are intended to be used as classroom references in training sessions conducted by individuals authorized by Crosby. Crosby provides instruction only on how to use the materials. Crosby does not select or determine whether each attendee is qualified to be a trainer. The management of companies requesting the Crosby training is responsible for determining the capability and suitability of all trainers in their employment.

Those who attend Day One, Course #CA005 will receive:

- Certificate of Completion
- A Crosby Seminar Workbook
- Crosby's laminated pocket reference guide

Those who attend the full two-day program, Course #CA005 and # CA006, will receive:

- Crosby General Catalog on CD-ROM
- Crosby CD-ROM Lift Guide (Computer-Based Course)
- A CD-ROM with PowerPoint files that can be used to print a basic set of overhead slides for a seven-hour presentation. You can create the overhead transparency slides at your facility or at a print shop such as Kinko's.
- The ability to order Crosby training materials at reduced prices.

Special Note: Those individuals who complete the full two-day course and complete the Request for Trainer Certificate form and the CD-ROM Lift Guide course (handed out on day two), Crosby will mail the following:

- A certificate stating the attendee is authorized to use the Crosby ASME training materials. Valid for four years.
- As a bonus, Crosby will also send a CD-ROM with PowerPoint files that can be used to print a basic set of overhead slides for 9 basic safety presentations at your facilities or at a print shop such as Kinko's. You will also be able to use on your computer. The CD-ROM also includes a Workbook that can be printed for each presentation.

Module 1: The Rigging Plan
Module 2: Inspection of Hardware and Slings
Module 3: Basic Sling Hitches
Module 4: The Rigging Triangle
Module 5: Hoist Hooks & Shackles
Module 6: Links and Rings
Module 7: Load Control
Module 8: Working with Blocks
Module 9: Wire Rope Clips and Other Terminations

- Certificate stating 1.6 CEU Credits representing 16 contact hours.

Classroom training is only a small part of the needed qualifications. Demonstrated ability on the job is equally important. Once the certificate request form is signed by a supervisor or manager and all requirements are met, we will send a "Certificate of Achievement" valid for four years.

Instructions for registering are on last page or contact your local Crosby distributor.

For Authorized Full Line Crosby Distributors and End Users of Crosby Products Only!

DAY 1
FUNDAMENTALS OF RIGGING
COURSE #CA-005
(NON-TRAINERS CAN ATTEND DAY 1 ONLY)
